

Communication Internship

About us

What we do

We are inventing the new wave of skin imaging.

Thanks to our cutting edge hardware and software we are able to view the skin in 3D with a cellular resolution and with a depth up to 500 μm .

We master both optical imaging technology and software-AI capabilities thanks to our blended culture.

Our various inventions, such as the LC-OCT 3D, have many applications:

- We help **Dermatologists** and Plastic **Surgeons** manage **cancer** and other disease faster and better.
- We support Clinical Research Organizations, the **Pharma** and **Cosmetics** Industries in their effort to develop efficient **drugs** and **products**.

Welcome to a world where you can **see beyond appearances**.

Who we are

We are a team of 20 people driven by **innovation** and **continuous improvement**.

Where we are

Our technology is **present** in more than **10 countries**, from the USA to China, and in **World Leading Hospitals**.

Join us as Communication Intern!

Mission

Among the Marketing team, you play a key role to **put the company as top of mind** in the Skin Imaging field through very broad responsibilities.

You will:

- Define our communication plan with the team (editorial calendar)
- Manage our communication through our social networks.
- Prepare with our PR agency the different media intervention from our team.
- Create various form of content (videos, blog, card games,...).
- Organize various events and congresses.

You are a **key member of an Agile team**, regularly delivering and improving.

On top of a team of passionate co-workers, you will benefit from:

- A close proximity with Physicians, including immersions in clinical sites.
- Many team events: after-works, restaurants, barbecues, winter/summer meetings.
- Participate to various congress and events.
- Ability to work remotely if needed.
