

Damae Medical is helping dermatologists to improve their management of skin cancer.

Our **deepLive™** solution provides an accurate, fast and reliable optical examination without performing a biopsy. CE marked, our medical device is based on LC-OCT (Line-field Confocal Optical Coherence Tomography) technology complemented by several software and Artificial Intelligence (AI) modules.

Welcome to a world where you can see beyond appearances!

- +30 patents
- +100 scientific publications
- +50 deepLive™ worldwide

- MIT Technology Review
- Innovation & AI awards (Kaggle)
- EU & French government support

- +20 M€ invested
- High level investors
- +30 people

Join us to be part of the **Application team**, as our new

APPLICATION ENGINEER

1. Training: Ensure the optimal use of the deepLive™ device

- Provide on-site training and customer support during the ramp-up phase
- Create training content to accelerate the ramp-up and facilitate diagnosis of most skin conditions
- Partner with the Customer Success team to animate the user community (congress, users clubs etc.)

2. Studies: Design, manage and monitor clinical studies

- Work with our clinical partners to design and monitor clinical studies to validate new indications
- Organize image review, perform statistical analysis and provide comprehensive study reports
- Partner with KOL on publications and presentations at major clinical congresses

3. Innovation: Support R&D teams to improve the device

- Build trust with customers and develop collaboration projects
- To develop new applications: act as a link between internal R&D and our customers (gather feedback, test prototypes, etc.)
- Build annotated images databases to support and validate the development of AI-based solutions

- 📍 Office located in Paris 13, ears open to the needs of comfort and equipment, ability to work remotely

What about you?

- Scientific graduate (Engineer, Master, etc.) or PhD thesis
- Experience or sensibility in medical / optical imaging or skin biology
- Easy communication internally and externally
- Proactivity, rigor, autonomy and customer-oriented mindset are essential qualities for the job
- A good level of English (spoken and written)
- Ability to travel nationally and internationally (1/3 of your time)
